Spray Tan

Capturing the Essence of the Aussie Lifestyle

Fair, freckled, olive or bronzed...whatever your skin type Sol™ Spray tanning solutions deliver a perfect, beach-bronze body so good, we guarantee you won't find a more natural-looking tan anywhere in Australia.

Why spend hours in sunbaking when a bronzed, beautiful body is just minutes away.

Preparing for your spray tan

Preparation is the key to perfect spray tanning result. Simply follow these easy steps to get the beautiful believable colour you'll love to wear.

1. Shave/wax and exfoliate thoroughly the day before tanning to achieve optimum results.
2. Do not apply moisturiser or wear make-up to your tanning session. These can act as a barrier to your tan and prevent even absorption.
3. Wear loose, dark clothing and underwear to your tanning appointment and do not wear stocks, pantyhose or closed shoes.

Maintaining your spray tan

Moisturised skin is the secret to a longer lasting tan as it slows the skin's natural exfoliation process.

1. Wait at least 8 – 12 hours before showering following your tan application.
2. Apply a good body moisturiser (we recommend Skinwear Tan Extending Moisture Mist) morning and evening following your post tan shower.
3. Avoid long, hot showers/baths and do not rub your skin vigorously. Pat skin dry.
4. Do not exercise on the day of your tanning application. Excessive perspiration will adversely affect the development of your tan.
5. Chlorine will shorten the duration of your tan so avoid swimming pools and Jacuzzis following application.
